SKILLS

- **Financial Analysis & Reporting:** Financial forecasting, IFRS compliance, cost control, variance analysis.
- **Financial Modelling:** DCF valuation, 3-statement models, sensitivity testing, scenario and ratio analysis.
- **Data Analytics & BI Tools:** Excel (Power Query), Power BI dashboards, KPI reports, pivot tables, slicers.
- **IT Systems & Support:** ServiceNow, asset lifecycle tracking, Microsoft 365, issue logging and device setup.
- **Security & Compliance:** Endpoint security, Active Directory, Azure Intune, ITIL protocols, device encryption.

WORK EXPERIENCE

IT Support Engineer

Molson Coors Beverage Company

January 2023 – Present

Longueuil

- Coordinated full asset lifecycle across different sites using digital logs, reducing hardware tracking delays by 35% and improving audit-readiness through standardized inventory control methods and periodic reconciliations.
- Analyzed incident data & service metrics to identify recurring issues, improving SLA resolution rate to 95% by developing escalation procedures & restructuring ticket across high-volume request categories in ServiceNow.
- Automated provisioning workflows in Active Directory & Intune using policy templates, reducing onboarding time by 25% & ensuring configuration across enrolled endpoints and managed devices via Microsoft Endpoint.
- Designed and published Power BI dashboards integrating ServiceNow and asset records, used monthly by finance teams to reconcile inventories and generate compliance summaries for internal reporting reviews with DAX.
- Developed asset reports from Excel macros and Power Query scripts, reducing reporting turnaround time by 40% and ensuring live tracking of 1000+ assets for monthly finance-led reconciliation with SharePoint sources.

IT Support Engineer – Project

Molson Coors Beverage Company

May 2022 – July 2022

Montreal

- Executed full-scale Windows migration for 300+ devices without system outages by pre-validating configurations and coordinating with department heads, ensuring seamless operational continuity and secure data preservation.
- Decommissioned 300+ devices using a secure data wipe protocol & asset de registration checklist, meeting IT audit standards while ensuring chain-of-custody compliance & timely handoff to disposal partners via ServiceNow.
- Optimized device setup workflows by refining SOPs & using deployment automation tools, cutting average installation time by 25% & improving day-one readiness for new equipment in departments via SCCM imaging.
- Generated pre- and post-migration status reports using system logs, allowing leadership to track implementation metrics and validate success criteria across migration checkpoints within the 2 month timeline using PowerShell.
- Coordinated end-user scheduling & inventory pre-checks, enabling smooth roll-out of upgrade kits while reducing errors in device mapping & improving pre-installation verification rates to 98% via Active Directory auditing.

PROJECTS

Amazon Financial Modeling & Valuation

Financial Modeling & Valuation Analyst, CFI

- Built 3-statement forecast model with lease adjustments, driving projected valuation up 15% across scenarios.
- Conducted DCF, SOTP, scenario, and comparable analysis, estimating its intrinsic equity value at \$1.3 Trillion.

Rolling 12-Month Budget & Forecast Model

FP&A Analyst Simulation, CFI

- Created a 12-month rolling forecast and budget using Excel with automated scenario and variance analysis.
- Developed interactive dashboards using Power Query and pivot tables for live budget monitoring and reporting.

RockCrusher Rentals – Credit Structuring & Risk Analysis

Credit Analyst Simulation, CBCA Program – CFI

- Assessed creditworthiness & structured a risk-adjusted SME loan using financials, projections, and market data.
- Composed a credit memo with pricing strategy, repayment structure, and recommendation for lending approval.

EDUCATION

Bachelor of Commerce (BCom), Business Technology Management

John Molson School of Business, Concordia University, Montreal

January 2020 – April 2024
